Exercise 1 Output

My Personal Page

[University of Calgary History](#)

My Hobbies

- Reading
- Gaming
- Traveling

Form

Enter your name:

- Section 1
 Section 2

Exercise 2 Answer:

1. The answer to Question 2.1:

When using a fixed width such as a direct pixel amount it ensures that the size of the image, text, form, etc. remains consistent across all browsers and displays(unless the pixel size is too large), whereas using a percentage makes it so that the formatting of the page remains the exact same as it takes up a fixed portion of the screen and not a direct size. This difference causes websites with fixed percentage to always have correct formatting but the time to responsiveness is slower as the webpage must base its settings around the individual device.

2. Output:

Like many Calgary success stories, ours has a spirited beginning, an unprecedented growth spurt and a promising future.

Even before Alberta became a province in September 1905, the citizens of a very young Calgary were determined to host a post-secondary institution as part of building a great city.

In 1906, the Alberta Normal School (which would later become our own Werklund School of Education) began operations and provided a steady stream of educators for a new province eager to grow and advance quickly.

Like many Calgary success stories, ours has a spirited beginning, an unprecedented growth spurt and a promising future.

Even before Alberta became a province in September 1905, the citizens of a very young Calgary were determined to host a post-secondary institution as part of building a great city.

In 1906, the Alberta Normal School (which would later become our own Werklund School of Education) began operations and provided a steady stream of educators for a new province eager to grow and advance quickly.

When the University of Alberta was founded in 1908 in Strathcona (now part of Edmonton), Calgarians were disappointed with the "branch plant" concept that ensued and lobbied for decades for an independent institution of their own. Students, faculty, staff, alumni, donors and volunteers joined together to support the cause, with great passion and commitment.

Their dedication was finally rewarded on April 29, 1966 when the University of Calgary was granted autonomy. From there, growth was fast and furious, as a new campus took shape and innovative educators came to Calgary from around the world.

In 2016-17, the University of Calgary marked its 50th Anniversary as an autonomous institution.

The roads that brought us here

What are our defining moments? They wind through 50 years and countless memories, each one stamping a mark on the cultural and physical landscape of our city. We're looking back but we're pushing forward.

Calgary's Urban Evolution

A university and a city growing together side by side.
